Mac OS X Map a Network Drive

Step 1 - Open Map Dialogue

- Select Finder
- Open the Go menu and select Connect to Server

Step 2 - Enter the Drive Name

- Type smb://server_name.win.ad.jhu.edu/sharename into the Server Address field, where share is the name of the folder you are trying to connect to.
  - NOTE: You MUST replace the word sharename with the share you're trying to map (eg. public, ms, your username).
  - Clicking the + button will add the share to your favorite servers list for easy access in the future.
- Click Connect to connect to the share. The connection will then prompt you for your credentials.
Step 3 - Enter Campus Domain Account Information

- Type *WIN* into the **Workgroup or Domain** field.
- Type your JHED username into the **Name** field.
- Type your JHED Password into the **Password** field.
- After clicking **OK** you can access the mapped drive from your desktop, as seen below.
- After clicking **OK** you can access the mapped drive from your desktop, as seen below.

- After clicking **OK** you can also access the mapped drive using the **Finder** application, as seen below.
